

How to configure Microweber Hosting Pro White Label

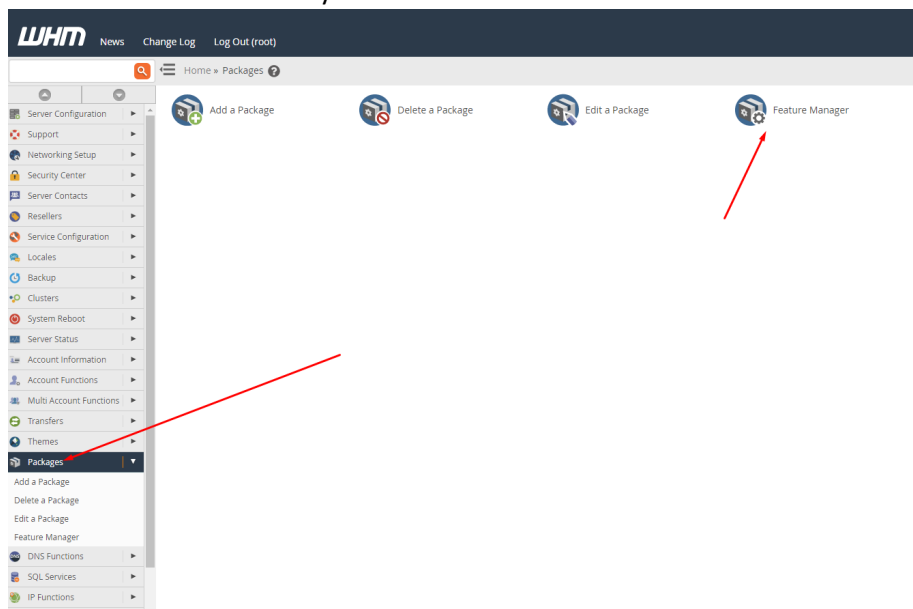

To configure your cPanel, WHMCS and Microweber White Label please follow the steps below:

1. You need to have an WHM/cPanel or Plesk server

1.1 If you have WHM/cPanel server

Install Microweber cPanel plugin <https://microweber.org/cpanel-plugin> and configure it as you want.

1.2 Create a Feature list from your cPanel

Feature Manager

This interface allows you to enable and disable features and cPAddons in each user's cPanel. To assign a feature list to a package, use the [Edit a Package](#) interface. For more information, read the [documentation](#).

- **default** — The system grants cPanel users access to these features by default. If you disable a feature from this list, the system will disable it in every user's cPanel that uses that list.
- **disabled** — cPanel users cannot access these features, and other lists cannot grant access to them.
- **Mail Only** — For cPanel users that can only access mail-related features, such as Email Archiving or SpamAssassin.

To create a feature list for a specific reseller account, you must prefix the list name with the reseller username and an underscore.

Add a new feature list

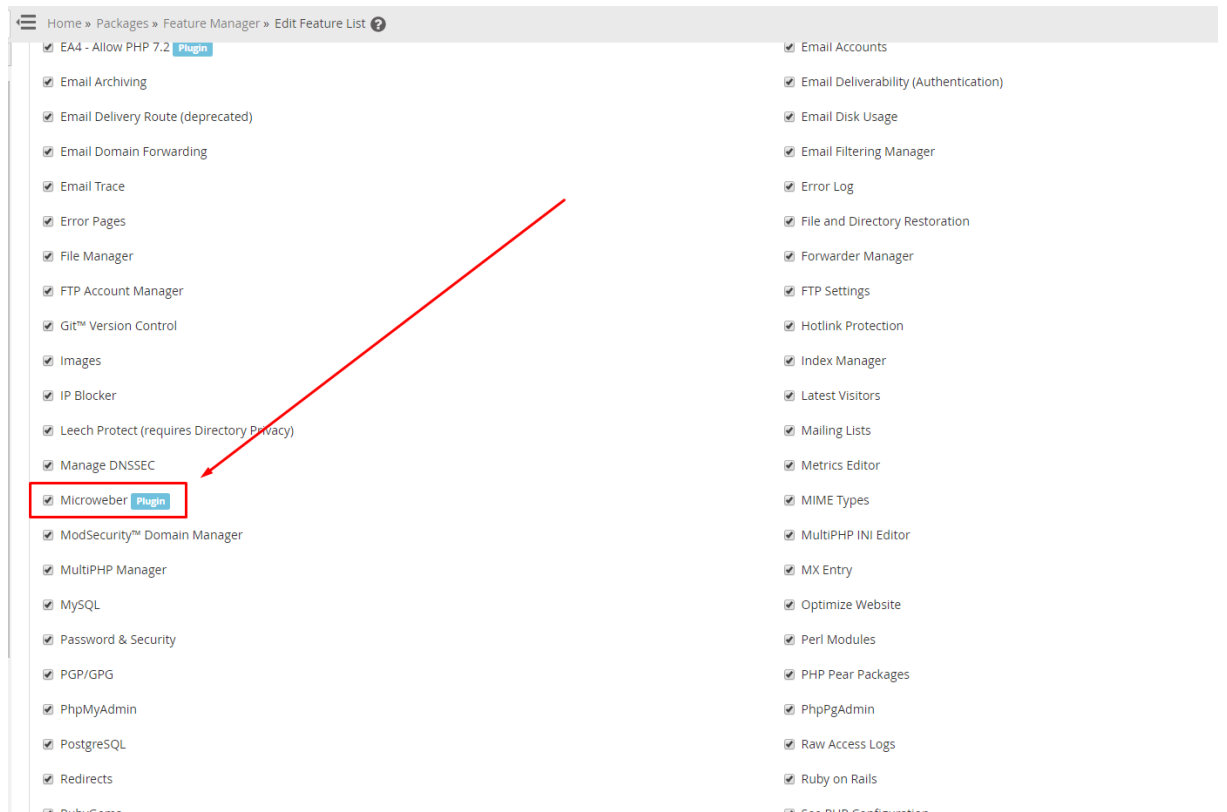

Add Feature List

Manage feature list

default

Edit

Delete

Microweber Plugin must be checked. Then click Save.

1.3 Create a WHM/cPanel Package with your preferred specifications and select the **Microweber Feature List**.

WHM News Change Log Log Out (root)

Home » Packages » Add a Package ?

Add a Package

Note: If a package name is preceded by a reseller's username and an underscore, only that reseller can see the package.

Package Name

Resources

Maximum Hourly Email by Domain Relayed	<input type="radio"/> 0	<input checked="" type="radio"/> Unlimited
Maximum percentage of failed or deferred messages a domain may send per hour	<input type="radio"/> 100	<input checked="" type="radio"/> Unlimited

1.4 If you have Plesk server

Install Microweber Plesk plugin <https://microweber.org/plesk-plugin> and configure it as you want.

2. You need to install WHMCS for managing your clients

2.1 Create a subdomain for your WHMCS billing platform. For example:

members.yourmaindomain.com where the red is the name of your subdomain and the green is your main domain

2.2 Buy WHMCS License from <https://www.whmcs.com/pricing/> then download the CMS from the WHMCS product page.

2.3 Install WHMCS (install instructions <https://help.whmcs.com/m/installation/l/678261-installing-whmcs>) on your subdomain **members.yourmaindomain.com**.

2.4 Upload [Microweber WHMCS Template](#) in `/home/members.yourdomain.com/public_html/templates`

Go to Setup->General Settings in your WHMCS Admin area and change the template.

The screenshot shows the 'General Settings' page in WHMCS. The 'Template' field is highlighted with a red box and contains the value 'Microweber'. Other fields include 'Company Name', 'Email Address', 'Domain', 'Logo URL', 'Pay To Text', 'WHMCS System URL', 'Limit Activity Log', 'Records to Display per Page', and 'Maintenance Mode'.

Save Changes

2.5 Change Main site address

Go to

/home/members.yourdomain.com/public_html/templates/microweber/includes/head.tpl and change the address with the url of your main site.

```
<!-- Styling -->
<link href="{WEB_ROOT}/templates/{template}/assets/css/bootstrap.css?v={versionHash}" rel="stylesheet">

<link href="//fonts.googleapis.com/css?family=Open+Sans:300,400,600|Raleway:400,700" rel="stylesheet">

<script>var mw_site = "{$mw_site}";</script>
```

2.6 Install Microweber WHMCS Addon

2.7 Go to Setup->Products/Services->Servers and add your server to the WHM/cPanel.

2.8 Go to Setup->Products/Services-> Products/Services and create your Microweber Plans which will be appear in the Main site.

2.8.1 Create a plans group as click on *Create a New Group* button

This screenshot shows the 'Create a New Group' form. It includes fields for 'Product Group Name' (set to 'Hosting'), 'Product Group Headline' (with a placeholder 'eg. Select Your Perfect Plan'), and 'Product Group Tagline' (with a placeholder 'eg. With our 30 Day Money Back Guarantee You Can't Go Wrong!'). There's a 'Group Features' section with a note: 'You must save the product group for the first time before you can add features'. Below this is the 'Order Form Template' section, which displays several templates: 'Standard Cart (Default)', 'Premium Comparison', 'Pure Comparison', 'Supreme Comparison', 'Universal Slider', and 'Cloud Slider'. At the bottom, there's a 'Hidden' checkbox with the label 'Check this box if this is a hidden group'. 'Save Changes' and 'Cancel Changes' buttons are at the bottom right.

2.8.2 Create a hosting plan as click on the *Create a New Product* button

Products/Services

This is where you configure all your products and services. Each product must be assigned to a group which can either be visible or hidden from the order page (products may also be hidden individually). A product which is in a hidden group can still be ordered using the Direct Order Link shown when editing the package.
